Providing Solutions to Help Business Grow

Goaltech delivers AI, data, and cloud solutions powered by microservices, DevOps practices, and a certified expert team. We lead seamless cloud migrations and help businesses turn data into actionable insights with measurable results.

Who We Are

Goaltech is a technology consultancy company, operating across the **UK and Türkiye.** We specialise in **Cloud Infrastructure, AI, Data Analytics,** and **DevOps**, delivering tailored solutions through our **certified AWS experts**.

With strong capabilities in **cloud migration** and **government-backed R&D programs**, we enhance our consultancy expertise through continuous innovation. Our focus is on building scalable, secure, and impact-driven systems that turn **data into strategic value**.

Why Choose Us

Innovation-Driven Consultancy

We contribute to TÜBİTAK and EU R&D programs and work closely with academia, which strengthens our consultancy through research-driven insight and real-world expertise.

Cloud Solutions by AWS-Certified Experts

Our AWS-certified team builds end-to-end cloud solutions using the latest technologies and best practices. We focus on cost-efficient architectures in Data+AI, platform engineering, DevOps, and security while ensuring seamless cloud migration.

International References

We provide trusted consultancy services to leading organisations across sectors in the UK and Türkiye, supporting transformation in finance, energy, telco, health, public services, and more.

THE DATA | AI COMPANY

Services & Competencies

Our AWS-certified team delivers data and AI-driven solutions tailored to the needs of modern industries. From scalable cloud architecture to intelligent analytics, we help businesses unlock real value — with secure, high-performance, and future-ready systems.

Data Analytics

We build secure and scalable analytics platforms on AWS, helping organizations unlock insights.

- Data lakehouse architecture
- Data warehosuing and visualisation
- Real-time and batch data processing (ETL/ELT)

AI & ML

We create AI solutions and develop ML algorithms, supported by TÜBİTAK and EU-backed research.

- Generative AI
- Computer Vision
- Deep and Reinforcement Learning Algorithms

DevOps & MLOps

We implement DevOps practices with AWS-native tools to ensure automated, scalable delivery.

- CI/CD pipelines
- Infrastructure as Code
- ML lifecycle automation

Platform Engineering

We design AWS-native platforms using containerized and event-driven architectures for performance and scalability.

- Microservices & containers
- Serverless APIs
- Logging and monitoring

Cloud Migration & Modernisation

We help businesses migrate to AWS with minimal downtime and maximum performance.

- Lift & shift or replatform strategies
- AWS Well-Architected reviews
- Cloud cost optimization & governance

Mobile & Web Apps Development

We build cloud-connected mobile and web apps with AWS backend services.

- API-driven apps
- Scalable storage & compute
- Secure authentication
